

Knowledge base

North East England is one of the most dynamic regions in Europe and we are driving the growth of its flourishing healthcare and life sciences economy.

A major part of our role is to support innovative technologies emerging from regenerative medicine, Ageing, Drug Discovery and Biomarkers, Immunology and the Biopharmaceutical supply chain. Along with partner organisations we facilitate successful commercial activities in these fields.

Here we aim to provide a snapshot of the ground-breaking initiatives, depth of expertise, supportive infrastructure and strong industrial base that makes the region such a vibrant place for anyone involved in these areas. Click on the following links to discover the knowledge base of the North East:

Ageing & Health

Biopharmaceutical Supply Chain

Drug Discovery and Biomarkers
