

## **North East England**

The North East covers the regions of Northumberland, Tyne and Wear, County Durham, Teesside and Tees Valley - and has a distinctive regional identity and a strong sense of history. It is one of the most dynamic regions in Europe with a population of 2.6 million and 8,592 square km of territory.

The region is building on this success with major new investments in initiatives such as Science City and Northern Way to drive new waves of growth in economic sectors including healthcare, new & renewable energy and advanced process industries - and importantly, for those living and investing in the region, the quality of life is second to none.
