

Researchers with potential technology

Cels can help researchers in the North East by providing the business support you need to develop an idea, secure funding and ultimately, take the product to market.

We can provide access to state-of-the-art incubator facilities such as Cels at Newcastle based at Newcastle University's Medical School. The incubator has an on-site meeting room and tenants benefit from the scientific and business support of Cels's laboratory manager.

Cels has close relationships with a number of organisations and agencies across the region which provide funding for business start-ups. We can put you in touch with these potential sources of investment and can also facilitate introductions with key organisations in the private and public sector, academics and clinicians.

Cels provides extensive business support and advice and our Venturing programme provides specific management and financial expertise.

Through NEPAF Cels is able to provide access to state of the art equipment and expertise in the field of proteomics to help evaluate potential products and provide supporting data to help raise start up funding.

HealthConnect, our healthcare network, provides researchers with the chance to discuss their ideas with other healthcare professionals and academics. HealthConnect also offers a number of membership benefits such as exclusive discounts and rewards.

Talk to us...to find out more about how Cels can help you contact us on 0191 215 5025.
